Heat Transfer Package

SYSTEM SUMMARY

System Flow _____ GPM	System Head _____ FT
Input Power Supply _____ V/ _____ PH/ _____ HZ	
Model Number _____	Air Separator Model and Size _____
Suction Diffuser Size _____	Triple Duty Valve Size _____

HEAT EXCHANGER

Model Number _____	Quantity _____
Specials _____	

TANK

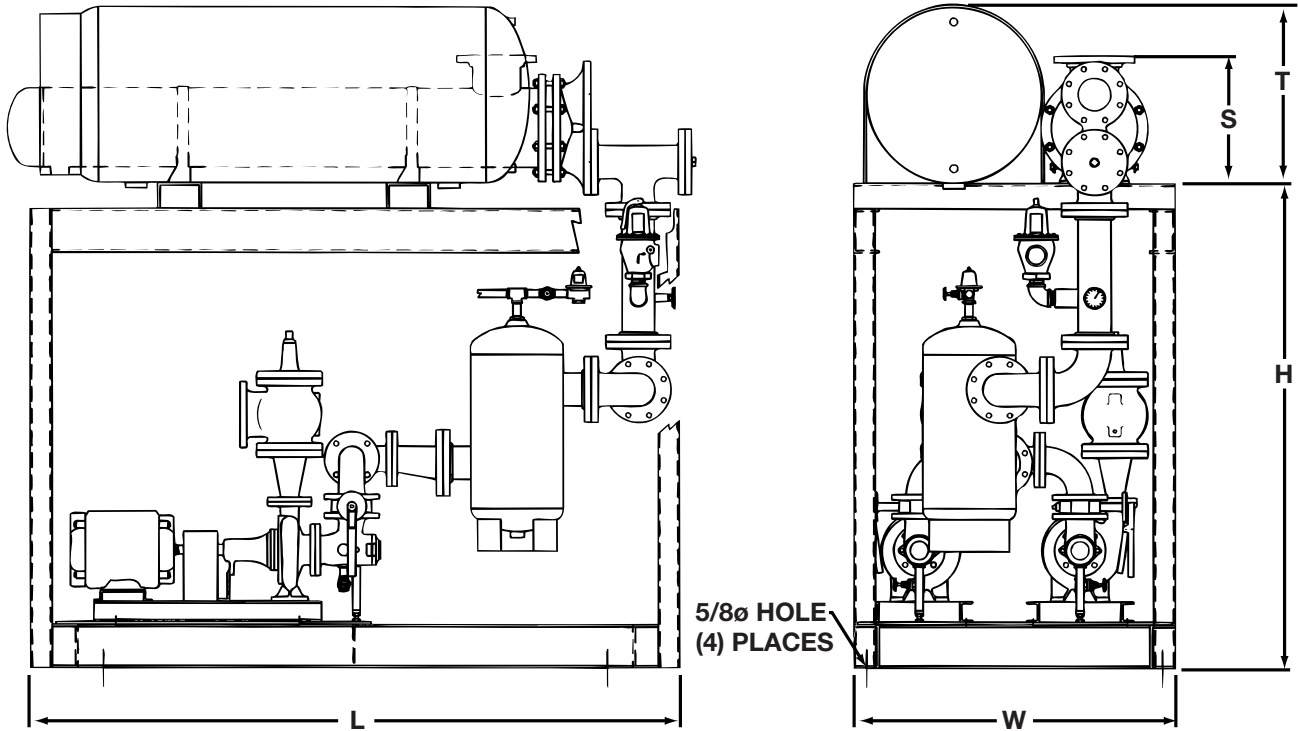

Type _____	Compression _____	Diaphragm _____	Bladder _____
Model Number _____	Sight glass included _____		

PUMP/MOTOR

Qty	Model	Size	GPM	TDH	HP	RPM
_____	_____	_____	_____	_____	_____	_____
Specials: _____						

OPTIONS

- Discharge header size (same size or larger than Triple duty valves) _____
- 5 gallon chemical shot feeder (discharge header required) _____
- 3/4" three valve bypass on PRV to allow system startup quick fill _____
- Differential pressure switch for pump failure indication (1 per pump) _____
- Blowdown valves for suction diffuser(s) and air separator _____
- Steam trap assembly Size _____ Model Number _____
- Steam Control Valve Assembly Size _____
- Model Number _____ Actuator(s) _____
- With bypass piping _____ Model & Part Number _____
- Control Panel _____
- With individual disconnects and fuses _____
- With individual disconnects and circuit breakers _____
- Automatic alternation _____
- Technologic 350 Microprocessor based controller _____
- Single pump operation with alternation _____
- Staging operation _____

Length = _____
(L)

Width = _____
(W)

Height = _____
(H + larger of S or T)

Do not use for construction. Dimensions are approximate and subject to change. Consult factory for certified dimensions.
