

Bell & Gossett Wet Rotor Circulators

Reliable, maintenance-free, whisper quiet wet rotor circulators designed for residential and light commercial heating systems.

Single Speed NRF Circulator Performance Curves

Three-Speed NRF Circulator Performance Curves

DuraGlide™ Bearing System (blue areas in cutaway illustration) incorporates several components working together to eliminate seasonal freeze-up

Powerful Red Fox motor with high starting torque provides years of trouble-free operation

Three speed motors on select models offer a wide range of hydraulic capabilities

One-piece, high-nickel stainless steel stator can isolate the stator from system fluid and maintains precision bearing alignment for longer bearing life

Carbon bearings, diamond-like ceramic shaft and generous clearances are more resistant to lime, chloride and oxide build-up

Face plate and rotor sleeve feature corrosion resistant stainless steel construction for longer life

Stabilized, heat resistant, non-metallic impeller. Its closed design improves operating efficiency

Self-cleaning particle shield protects the shaft and bearings from system start-up debris
