

## End Suction Close Coupled Centrifugal Pumps

### **Series 310 Advantages**

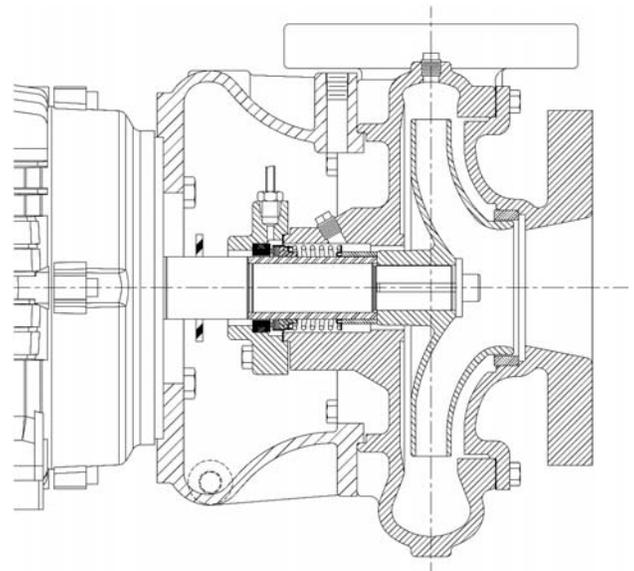

With capacities to 2000gpm and heads up to 260', Weinman general service close coupled pumps are low cost pumping units that provide efficiency and dependability. These dependable pumps are a rugged design based on the most advanced principles of hydraulic engineering. Their compact design saves floor space while their adaptability permits maximum operating efficiency in any position, horizontal or vertical. The result is efficient operation with a modest initial investment and low operating and maintenance costs.

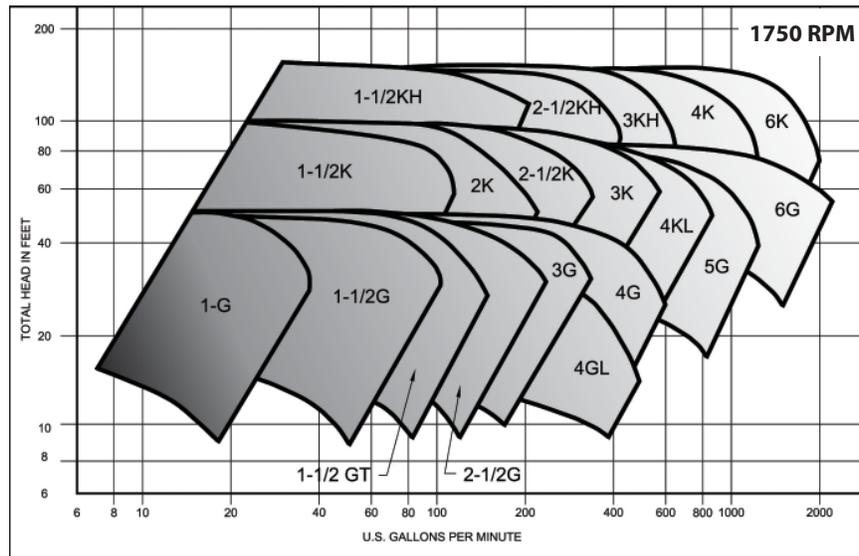

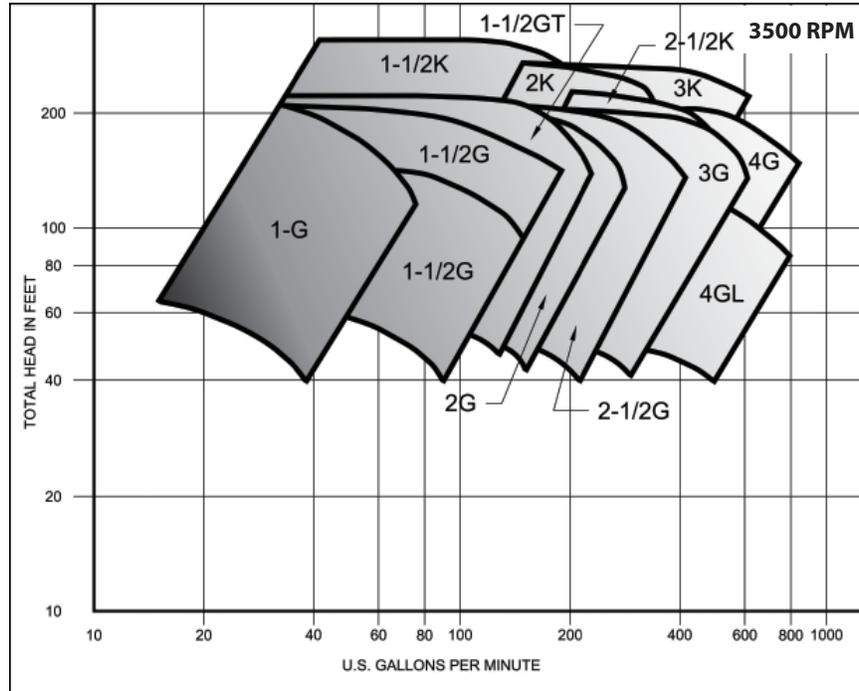

### **Features & Benefits**

- Cast iron suction cover design allows replacement of impeller and wear ring without disturbing alignment.
- Bronze enclosed impeller.
- Bronze renewable shaft sleeve.
- Bronze renewable suction cover wear ring and optional impeller wear ring.
- Motors are equipped with grease lubricated ball bearings with the capacity for handling the thrust and radial loads of the pump.

Heads to 260'  
Flows to 2000GPM  
Up to 50 HP
