

Propeller Pumps

Fairbanks Morse
Pentair Water

Fairbanks Morse Pump propeller pumps are designed to efficiently move large volumes of water at low heads.

APPLICATIONS:

- Flood Irrigation
- Canal/Transfer
- Dairy

Mixed Flow

- Flows to 28,000 gpm
- Heads to 60 feet TDH
- Bowls 10" to 30"

Axial Flow

- Flows to 30,000 gpm
- Heads to 60 feet TDH
- Bowls 8" to 36"

FEATURES:

- Heavy-duty high quality cast iron bowl castings with smooth passageways enhance efficient operation
- Intermediate and discharge bowl bearings are product-lubricated and designed to carry maximum loads over long service life.
- Suction bell features integrally-cast guide vanes to reduce vortexing and entrance losses.
- Discharge diffuser vanes provide smooth flow entering the discharge column.

Fairbanks Morse offers both line shaft turbine and propeller pumps to meet all of your agricultural irrigation and dairy needs.
