

self-priming cast iron shallow well jet pumps

The ProJet™ SN Series Pumps provide excellent performance with good pressure for wells to 25' deep. Self-priming after the priming chamber has been filled with water.

APPLICATIONS

■ Water systems and sprinkling... for homes, farms and cottages.

SPECIFICATIONS

Max. Liquid Temperature: 140°F Max. Inlet Pressure: 50 PSI

Average Priming Time at 15 Feet:

SNC = 2.3; **SND** = 1.7 **SNE =** 1.3: **SNF** = 1.1

Average Priming Time at 25 Feet:

SNC = 6.4; **SND** = 4.4 **SNE** = 4.4: **SNF** = 2.6

Body – Close-grained cast iron

Nozzle – High strength Lexan®

Venturi - Lexan®

Impeller - Noryl®

Diffuser – Reinforced polypropylene

Shaft – One-piece threaded, 416 grade stainless steel

Base – Steel, 12 gauge

ProJet™ SN SERIES

FEATURES

Quality Construction – Closegrained cast iron body. Drain port provided for easy winterizing.

Built-in Jet – High strength Lexan® nozzle and venturi for maximum resistance to corrosion and abrasion. Clean out plug provided for ease of service.

Noryl® Impeller – Precision-molded for perfect balance... ultra-smooth for highest performance and efficiency.

Precision Molded Diffuser -

Pump primes faster, handles more air, with multi-port, precision-molded, reinforced polypropylene diffuser.

Mechanical Shaft Seal – Precision lapped and highly polished carbonceramic, stainless steel construction. Internal design guarantees continuous water lubrication.

Motor Windings – Superior insulation materials protect against excessive moisture and contaminants... assure prolonged motor life.

Balanced Rotor – Die cast under high pressures for uniform performance and greater efficiency, dynamically balanced.

Heavy-duty Ball Bearings – Shielded, permanently lubricated bearings, extensively tested to ensure extended life and smooth, quiet operation.

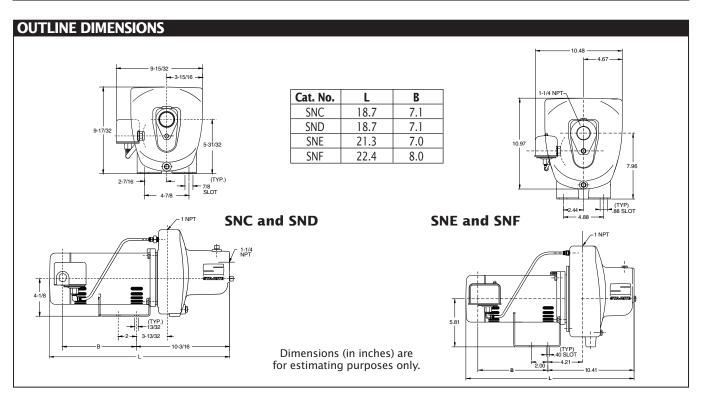

Pump and Motor Shaft – Stainless steel for maximum corrosion resistance; one-piece threaded shaft for positive impeller drive and alignment.

Dustproof Cover – All electrical components are protected from dirt, dust and insects by a dustproof canopy; ventilating air cannot contaminate vital switching components.

Pressure Switch – Professional quality, allows cut-in adjustments.

Pump will operate at all depths shown, with pressure switch set at 30-50 PSI.

Tested and rated in accordance with Water Systems Council Standards.

NOTE: Pumps installed with a PRO-Source™ tank require a 100 PSI relief valve. Pumps installed with a conventional tank require a 75 PSI relief valve. Relief valve must be capable of relieving entire flow of pump at relief pressure.
