

self-priming cast iron convertible jet pumps

FL Series Pumps feature a proven self-priming “convertible” design. The same convertible jet can be attached to pump for use on shallow well installation, or be utilized in 4" or larger wells for use as a double pipe deep well jet.

FL Series Pumps provide high capacities up to 11 GPM... depths to 90 feet. They are rated for 30-50 PSI operation.

APPLICATIONS

- **Water systems and sprinkling...** for homes, farms and cottages

SPECIFICATIONS

- Body and Base** – Close-grained cast iron
- Impeller** – Lexan®
- Diffuser** – Reinforced polypropylene
- Shaft** – One-piece threaded 416 stainless steel
- Pressure Switch Pre-Set** – 30-50 PSI
- Suction Ports** – Drive-over-Suction

ORDERING INFORMATION

Catalog Number	HP	Description	Pipe Tapping Sizes			Motor Voltage	Approx. Wt. Lbs.
			Suction	Drive	Disch.		
FLC	1/2	Deep Well Jet	1-1/4"	1"	1"	115/230	44
FLD	3/4	Deep Well Jet	1-1/4"	1"	1"	115/230	45

A Jet Package should be ordered with every FL Series Pump.

NOTE: Pumps installed with a PRO-Source™ tank require a 100 PSI relief valve. Pumps installed with a conventional tank require a 75 PSI relief valve. Relief valve must be capable of relieving flow of pump at relief pressure.

Lexan® is a registered trademark of General Electric Co. PRO-Source™ is a trademark of Pentair Water.

In order to provide the best products possible, specifications are subject to change.

FL SERIES

FEATURES

Quality Construction – Close-grained cast iron pump body and base are rugged one-piece unit, specially treated to resist corrosion. Drain port provided for easy winterizing.

Pressure Regulator – Simple, built-in regulator is performance proven. Adjustable for best performance on all deep well installations.

Lexan® Impeller – Precision-molded for perfect balance... ultra-smooth for highest performance and efficiency.

Precision Molded Diffuser – Pump primes faster; handles more air, with multi-port, precision-molded, reinforced polypropylene diffuser.

Mechanical Shaft Seal – Precision lapped and highly polished carbon-ceramic, stainless steel construction. Internal design guarantees continuous water lubrication for maximum protection.

Motor Windings – Superior insulation materials protect against excessive moisture and contaminants... assures prolonged motor life.

Balanced Rotor – Die cast under high pressures for uniform performance and greater efficiency... dynamically balanced.

Heavy-duty Ball Bearings – Shielded, permanently lubricated bearings, extensively tested to ensure extended life and smooth, quiet operation.

Pump and Motor Shaft – Stainless steel for maximum corrosion resistance; one-piece threaded shaft for positive impeller drive and alignment.

Dustproof Cover – Dustproof canopy protects all electrical components from dirt, dust and insects; ventilating air cannot contaminate vital switching components... eliminates the most common cause of motor failure.
